

Components

- 1 HotLok Blanking Panel
- 2 HotLok Clip with Mounting Extrusion
- 3 HotLok Blanking Panel Sheet

SPECIFICATIONS

General Information

- Cost effective solution that fills a number of open U space in a single rack.
- Blocks circulation of exhaust air through open U spaces, eliminating “hot spots” at equipment intakes.
- Compliments and enhances the performance of existing blanking panels in the server rack.
- Improves IT equipment reliability and extends equipment life.
- Prevents loss of valuable conditioned air from cold aisle containment spaces.
- Supports increasing rack density.
- Supports raising cooling unit set points which increase the capacity of existing cooling units.
- Tool-less design that can easily configure 3U, 9U and 12U blanking sheets in combination with standard 1U and 2U HotLoks to fill an entire cabinet or any open portion.
- UL 94 HB Fire Resistant
- RoHS Compliant

DIMENSIONS

- Available sizes:
 - 42U kit for new installations, Tate P/N K10143, includes HotLok Blanking Panels, Blanking Sheets, and mounting clips.
 - 36U kit for retrofit installations, Tate P/N K10144, is available without HotLok Blanking Panels (requires existing installed HotLok units).

FINISHES

- Color – Black
